

# UX Researcher, Zürich

We're looking for a UX Researcher to support our Zurich-based team at Google with conducting UX research. This is a **12-month engagement**, located in Zurich. This will be a temporary UXR role with a 3rd party agency on behalf of Google.

## Requirements

- Work permit for Switzerland
- At least 3 years of experience **preparing and conducting usability studies**
- At least 3 years of experience **analysing surveys; statistical skills**
- At least 3 years of experience preparing and conducting **strategic research**
- Strong **oral and written communication skills**; can **present findings concisely and effectively**
- Detail oriented and ability to work independently on a variety of tasks
- Excellent **analytical ability**, especially with regard to observation of user behaviour
- BA/BS in Computer Science, Human-Computer Interaction, Cognitive Science, Experimental Psychology, Anthropology, Information Science, related fields, or equivalent practical experience.
- Experience with the following is a plus: web technology and standards, business applications, online ads, retail.

## Responsibilities

- Preparing user research activities
- Planning, observing and moderating usability testing sessions and interviews
- Administering questionnaires, surveys, and interviews
- Taking notes during user study sessions
- Analyzing qualitative data
- Creating reports
- Communicating findings from the study to the research lead

If you think you could be a great fit for this role, please reach out to me directly.

Best,  
Clemens Steiner
